**GRADUATION RATE:**

0% of students attending this program graduated during the last two calendar years for which data is available.

940 CMR 31.03 defines graduation rate as the number of students who received certificates, diplomas, or degrees in the program during the latest two calendar years, divided by the number of students who enrolled in the program during the latest two calendar years. This required definition may result in a graduation rate greater than 100% when the number of students who enrolled in the program during the time period is lower than the number of students receiving certificates, diplomas, or degrees during the time period because the required definition does not consider the total enrollment of the program over the time period. Similarly, the required definition may result in other disproportionately high graduation rates in the event that the number of students who enroll during the time period is less than the total number of students in the program who are eligible to receive certificates, diplomas, or degrees during the time period because the required definition does not consider the total enrollment of the program over the time period. Alternatively, the required definition may result in disproportionately low graduation rates in the event that the number of students who enroll during the time period exceeds the total number of students in the program who are eligible to receive certificates, diplomas, or degrees during the time period because the required definition does not consider the total enrollment of the program over the time period. **PLACEMENT RATES:**

Graduate Placement Rate: N/A of graduates during 2021-2022 obtained full-time, non-temporary jobs in their field of study.

Total Placement Rate: N/A of students that enrolled in the program during 2021-2021 obtained full-time, non-temporary jobs in their field of study.

Employment statistics substantiating these placement rates are available for inspection on request. The University collected this information via survey from students graduating during 2021 and 2022. The University notes that despite reasonable efforts taken to gather employment data from graduates, many graduates do not respond to the survey. The overall response rate of Massachusetts graduates across all University of Phoenix programs to the survey was 72%.

For purposes of computing the graduate placement rate, only graduates who affirmatively responded to the survey and indicated that they obtained full-time (at least 32 hours per week), non-temporary employment in the field of study are counted as employed.
